

Metal Injection Molding

- ☑ Custom metal injection molding with metal feedstocks including stainless steel, tool steels, copper, titanium, tungsten, and more.
- ☑ Injection molding of single-cavity and multicavity molds
- ☑ 110-ton metal injection molding press
- ☑ 1.9-ounce shot size ☑ 2.7-ounce shot size ☑ 3.7-ounce shot size
- ☑ Product Design Assistance
- ☑ Design for Manufacturability (DfM) Feedback
- ☑ Material selection and validation
- ☑ Prototyping
- ☑ Performance and management of value-added secondary operations
 - Post-processing operations in our high-precision machine shop
 - Plating
 - Product assembly
 - Ink Pad Printing
 - Anodizing
 - Packaging
 - Labeling
 - Debinding
 - Warehousing
 - Heat treating
 - Sintering
 - Shipping
 - Machining
- ☑ Strict quality inspections to meet or exceed the quality requirements for all products and processes
- ☑ 24/7 operations capability to meet customers' demands
- ☑ In-house collaborative personnel who thoroughly understand the highly interdependent processes of mold building and injection molding to provide what most companies cannot—a true one-stop shop for precision injection molded parts
